Before our events, we field many phone calls, texts and emails with racers telling us there are not many in their category and they are waiting till others sign up. We believe this is hurting the race and keeping the categories and age brackets from filling up. This is the reason many race organizations never publish the confirmed rider list and only publish the start list once registration is closed.

For those reasons we will no longer publish the confirmed rider list until registration closes.

Thank you for understanding and we feel this will make the events better as they will provide more competition for all.
