

Many people have been asking us "What is Super D". Super D (SD) will use similar trails that were used for Enduro (not down the face). The differences for our SDs are a 2-run format on the same trail and you choose your best time. Shuttles to all runs and no such thing as a transfer like Enduro has. We used to do SD before we ventured into Enduro. For us, the SD is way more popular than the Enduro. SD is mostly DH but can have an uphill section so we will have more racecourse options. All bikes and rider levels can do this unlike some of our DH courses.
